Contents

1 INTRODUCTION 19

1.1 OVERVIEW OF THE BOOK 19
1.2 OVERVIEW OF THE BALTPORTS-IT PROJECT 20
1.2.1 Motivation 20
1.2.2 Objectives 21
1.2.3 Approach 21
1.2.4 Customisation of Simulation and Information Systems 22
1.2.4.1 Application of Simulation and Modelling in Baltic port areas 22
1.2.4.2 Customisation of Marine Information Systems 23
1.2.4.3 A Non-monetary Evaluation Methodology for Small and Medium-sized Ports 24
1.2.5 Exploitation of Results 24
1.3 CHARACTERISTICS OF THE BALTIC PORTS OF THE ASSOCIATED CANDIDATE COUNTRIES 25
1.3.1 Introduction to Eastern Baltic Ports 25
1.3.2 Pan-European Transport Corridors 27
1.3.3 Cargo Turnover in Eastern Baltic Ports 30
1.3.4 Port of Tallinn 31
1.3.5 Port of Riga 35
1.3.6 Port of Ventspils 37
1.3.7 Port of Klaipėda 40
1.3.8 Port of Gdansk 42

2 SIMULATION AND MODELLING APPLICATIONS IN THE BALTIC PORT AREAS OF THE ACC 45

2.1 CUSTOMISING AND EXPLOITING PORT SIMULATION SYSTEMS (INTRODUCTION) 45
2.2 THE BALTIC CONTAINER TERMINAL SIMULATION SYSTEM 47
2.2.1 Introduction 47
2.2.2 Reviewing of terminal business processes 48
2.2.3 Hierarchically incorporated models of BCT 49
2.2.4 Introducing the Lowest Level Model 53
2.2.4.1 Simulation Variables 54
2.2.4.2 Mathematical Problem formulation 57
2.2.5 Processing 40' containers 60
2.2.5.1 Unloading Process 60
2.2.5.2 Loading Process 62
2.2.6 Processing 20' Containers 62
2.2.6.1 Unloading Process 62
2.2.6.2 Loading Process 64
2.2.7 Modelling Resource Units 66
2.2.8 Model Parameter Adjustment 67
2.2.8.1 Group 1: Line-specific Variables 67
2.2.8.2 Group 2: Internal Parameters of the Model 70
2.2.8.3 Model Output 74
2.2.9 Model Analysis 76
2.2.9.1 Net Productivity as a Function of the Number of Trucks 77

2.2.10 Conclusions ... 82
2.3 APPLICATION OF THE PORT PROCESS SIMULATOR IN THE PORTS OF GDANSK, KLAIPEDA AND RIGA ... 84
2.3.1 Introduction ... 84
2.3.2 Port Operational Background ... 84
2.3.3 IT and Software Engineering Background ... 85
2.3.4 The Port Process Simulator® Model ... 86
2.3.5 Systems Requirements ... 92
2.4 THE PORT PROCESS SIMULATOR ... 92
2.4.1 Map Coordinates ... 92
2.4.2 Cargo Flows ... 94
2.4.2.1 Cargoes ... 94
2.4.2.2 Transport Modes ... 94
2.4.2.2 Vessel Call Frequencies ... 95
2.4.2.3 Defining Vehicles ... 96
2.4.3 Port Layout ... 96
2.4.4 Cargo Handling Facilities ... 97
2.4.4.1 Simulation ... 99
2.5 REGULATIONS AND ORGANISATIONS ... 102
2.6 RESULTS ... 103
2.7 CALIBRATION ... 105
2.8 APPLICATIONS OF THE PORT PROCESS SIMULATOR ... 105
2.8.1 Port of Gdansk, Poland ... 105
2.8.2 Port of Klaipeda, Lithuania ... 107
2.8.3 The Port of Riga, Latvia ... 107
2.9 THE KLAIPEDA OIL TERMINAL SIMULATION SYSTEM ... 109
2.9.1 Logistics Processes in Klaipeda Oil Terminal ... 109
2.9.2 Klaipeda Oil Terminal Simulation Model ... 111
2.9.2.1 Model Parameters ... 116
2.9.2.2 Model characteristics ... 117
2.9.2.3 Characteristics of Logistics Processes ... 117
2.9.3 Simulation Results ... 118
2.9.3.1 Model Parameters ... 118
2.9.3.2 Graphics of Characteristics ... 120
2.9.4 Conclusions ... 122
2.10 SIMULATION-BASED IMPROVEMENT OF LOGISTICS PROCESSES AT THE PORT OF GDANSK ... 123
2.10.1 Introduction ... 123
2.10.2 Tools and Methodology ... 123
2.10.2.1 Main Features of the Port Process Simulator ... 124
2.10.2.2 Additional Tools Employed ... 125
2.10.2.3 Purpose-built Post-processing Software Tools ... 126
2.10.2.4 Port Simulator Customisation and Evaluation ... 129
2.10.3 Simulations of Port of Gdansk Operation ... 131
2.10.3.1 Gdansk Container Terminal – A Case Study ... 131
2.10.3.2 Container Terminal Simulations Based on Real Data ... 135
2.10.3.3 Analysis of Simulation Results ... 143
2.10.3.4 Recommendations from the Simulation Aimed at Improving Logistics Processes at GCT ... 144
2.10.4 Conclusions ... 145
2.11 DISTRIBUTED AND WEB-BASED SIMULATION ... 146

2.11.1 Analysis of the current state for distributed and Web-based Simulation 146
2.11.1.1 Distributed Simulation with HLA 146
2.11.1.2 Web-based Simulation 150
2.11.2 Development Concepts and Architectures for Providing Simulation Services in Maritime Areas 154
2.11.2.1 Components 154
2.11.2.2 File Manager Services 155
2.11.2.3 Websim Input Form Generator 156
2.11.2.4 A Converter for Animations - PROOF2SVG 158
2.11.3 Evaluation of Different Forms of the Interoperability of Simulation Models in the Baltic Port Areas 160
2.11.4 Prototypes and Applications 164
2.11.4.1 Web-based Simulation 164
2.11.4.2 Distributed Simulation Application 168
2.12 QUALITATIVE ANALYSIS OF ORGANISATIONAL STRUCTURES: A STRUCTURAL MODEL-BASED APPROACH 171
2.12.1 Introduction 171
2.12.2 The Milestones of Structural Modelling Methodology 171
2.12.3 Knowledge Base and Modelling System Architecture 173
2.12.4 Structural Model-based Reasoning 174
2.12.5 Tools for Qualitative Analysis of Organisational Structures 176
2.12.6 Analysis of the Port Organisational Structures 178
2.13 SUMMARY 180

3 CUSTOMISATION AND APPLICATION OF MARINE INFORMATION SYSTEMS 181

3.1 INTRODUCTION 181
3.2 CREATING FORMAL SPECIFICATIONS OF BUSINESS PROCESSES AT THE KLAIPEDA STATE SEA PORT AUTHORITY AND THE KLAIPEDA OIL TERMINAL 183
3.2.1 Using PLA Formalism for Harbour Process Analysis 183
3.2.2 Concepts of Business Process Modelling 186
3.2.3 Formal Specification of Business Processes at the Klaipeda Oil Terminal 187
3.2.3.1 Description of Business Processes at the Klaipeda Oil Terminal with UML 187
3.2.3.2 Transferring Oil Products to the Appropriate Platform 192
3.2.3.3 Transferring Oil Products to the Appropriate Reservoir 192
3.2.3.4 Pumping Oil Products to the Ship 192
3.2.3.5 Description of Business Processes of Klaipeda Oil Terminal with PLA 195
3.2.4 Formal Specification of Business Processes at Klaipeda Seaport Authority 197
3.2.4.1 Conceptual Description of Business Processes 197
3.3 APPLYING LISTECHNOLOGY TO BUSINESS PROCESS ANALYSIS AND RE-ENGINEERING AT VENTAMONJAKS 209
3.3.1 Business Processes at the Transhipment Company JSC Ventamonjaks 209
3.3.2 Introduction to data processing systems structure analysis and design methodology LISTechnology 210
3.3.3 Structuring and Analysis of Information Flows at JSC Ventamonjaks 215
3.3.4 Dynamic Analysis of the Transhipment Process 218
3.3.5 Recommendations for Structural Re-organisation and Business Process Re-engineering at JSC Ventamonjaks 221

3.4 CUSTOMISATION OF A MARINE INSURANCE INFORMATION SYSTEM 224
3.4.1 Introduction 224
3.4.2 Study and Analysis of Business Processes 224
3.4.3 Integration of the Marine Insurance Information System in an Information Management System 226
3.4.4 Exploitation 227
3.4.4.1 Calculation of Premium Rate 227
3.4.4.2 Insurance Tariff Rate Calculation 228
3.4.5 Internet and Insurance 231
3.4.6 Conclusions 233
3.5 COMBINING PORT SIMULATION AND INFORMATION SYSTEMS 234
3.5.1 Object-oriented Analysis and Design 234
3.5.2 Possible Technologies for Integrating Simulation Models in Information Systems 237
3.5.3 Object-oriented Simulation System Library 240
3.5.3.1 SPranas Package 241
3.5.3.2 Simulation Package 244
3.5.3.3 Description of the Simulation Model Construction Technique 245
3.5.3.4 Creating of the Simulation Model Composition 246
3.5.4 Incorporating the Klaipeda Oil Terminal Simulation Model in the Terminal Information Management System 250
3.5.4.1 Requirements for the Tanker Loading Schedule Subsystem 250
3.5.4.2 TLOCS System Architecture 253
3.5.4.3 Terminal Simulation Model. 254
3.5.4.4 Railway Simulation Model 255
3.5.4.5 Tanker Loading Schedule Subsystem Prototype 255
3.5.4.6 Conclusions 256
3.5.5 Connecting the Baltic Container Terminal Simulation System to the Terminal Information System 257
3.5.5.1 Baltic Container Terminal Information System 258
3.5.5.2 Interfacing Arena files (.doe) with External Data Sources by (.xls) Files 261
3.6 SUMMARY 264

4 A NON-MONETARY EVALUATION METHODOLOGY FOR SMALL AND MEDIUM-SIZED PORTS 265

4.1 SUMMARY 265
4.2 INTRODUCTION 266
4.3 ADDITIVE, MULTI-ATTRIBUTE UTILITY THEORY (MAUT) AND PORTS .. 267
4.3.1 Theoretical Background 267
4.3.2 Difficulties Inherent in the Evaluation of Multidimensional Problems 270
4.3.3 Principles of Solution 270
4.3.4 Methodology Leading to Practical Application 271
4.3.5 The Sequence of Steps Required in the Application of MAUT 272
4.4 PRACTICAL APPLICATIONS 274
4.4.1 Port Governance 274
4.4.1.1 Development of a Possible Alternative Solution and Conclusions 275
4.4.2 Port Evaluation 276
4.4.2.1 A Generic Model 276
4.4.2.2 Application of MAUT to the Port of Gdansk 283
4.4.2.3 Application of MAUT to the Port of Klaipeda 283

5 SETTING UP OF THE BALTIC SUB-REGIONAL COMPETENCE CENTRE IN THE FIELD OF LOGISTICS, ADVANCED IT-SOLUTIONS AND SIMULATION WITH MARITIME APPLICATIONS 285

5.1 OBJECTIVE, SERVICES AND INFRASTRUCTURE 285
5.2 SOLUTIONS 286
5.3 WEB-SITE 288
5.4 CURRENT STATE AND PROSPECTS 289

6 FIGURES 291

7 TABLES 297

8 BIBLIOGRAPHY 298

9 APPENDIX 305

9.1 QUALITATIVE ANALYSIS OF THE ORGANISATIONAL STRUCTURE OF THE STATE IMPORTER AT THE FIRST LEVEL OF GRANULARITY 305
9.2 QUANTITATIVE ANALYSIS OF THE ORGANISATIONAL STRUCTURE OF THE STATE EXPORTER AT FIRST LEVEL OF GRANULARITY 308
9.3 QUALITATIVE ANALYSIS OF THE ORGANISATIONAL STRUCTURE OF THE STATE IMPORTER AT THE SECOND LEVEL OF GRANULARITY 310
9.4 QUALITATIVE ANALYSIS OF THE ORGANISATIONAL STRUCTURE OF THE STATE EXPORTER AT THE SECOND LEVEL OF GRANULARITY 314

Index of Authors

Authors	Chapters
Krzystof Amborski	2.10
Anrijs Aumalis	3.3
Vladimir Bardachenko	2.2, 3.5.5
Eberhard Blümel	1, 5
Andrzej Dzielinski	2.3, 2.10
Bernd Gebert	2.11
Egils Ginters	3.3, 5
Janis Grundspenkis	2.12, 9
Fred Kamperman	1.2, 2.2, 2.3, 3.5.5
Przemyslaw Kowalczuk	2.3, 2.10
Dalius Makackas	2.9, 3.2
Yuri Merkuryev	2.1, 2.2, 2.13, 3.5.5
Galina Merkuryeva	2.1, 2.2
Leonid Novitsky	1, 3.1, 3.4, 3.6, 5
Henrikas Pranevicius	2.9, 3.2, 3.5
Vytautas Pilkauskas	3.5
Vasily Ragozin	3.4
Fredijs Rekners	1.3, 3.3
Felix-Anton Schmidt	2.3-2.8, 4
Thomas Schulze	2.11
Marco Schumann	1, 2.11
Andrey Solomennikov	2.2
Jerzy Sukiennik	1.3, 2.10
Marina Uhanova	3.4
Elena Viktorova	3.4
Svetlana Vinichenko	1.3, 5
Rahila Yazdani	2.3-2.8, 4
Algimantas Zygus	1.3, 2.3, 4.3
