

**ABSTRACTS**  
**of**  
**55<sup>th</sup> International Scientific Conference**  
**Subsection**  
***Environmental***  
***and Climate Technologies***

**International Scientific Conference  
on Environmental and Climate Technologies**

# Contents

Analysis of electricity user behaviour: case study based on results from extended household survey .....	4
Electrolysis Process Analysis by Using Low Carbon Content Additives: a Batch Test Study .....	5
Economic assessment of biomethane supply system based on natural gas infrastructure .....	7
Energy efficiency in multi-family residential buildings in Latvia. Costs benefit analysis comparing different business models .....	9
Life cycle assessment of renewable energy alternatives for replacement of natural gas in building material industry .....	11
Green education policy in Baltinava Secondary School .....	13
Comparative Multiple Regression Analysis of Households' Electricity Use in Latvia: Using Smart Meter Data to Examine the Effect of Different Households' Characteristics .....	15
Preliminary Analysis of Anaerobic Digestion Process Using <i>Cerathophyllum demersum</i> and Low Carbon Content Additives: a Batch Test Study .....	17
Application of low-carbon technologies for cutting household GHG emissions .....	19
Performance indicators approach for analysis of industrial symbiosis .....	20
Analysis of the impact of decreasing district heating supply temperature on combined heat and power plant operation .....	21
A Preliminary Study of Biorefinery Concept to Obtain Furfural and Binder-less Panels from Hemp ( <i>Cannabis Sativa L.</i> ) Shives .....	23
Application of ISO 50001 for implementation of sustainable energy action plans .....	24
Sustainable use of macro-algae for biogas production in Latvian conditions: a preliminary study through an integrated MCA and LCA approach .....	25
Economy of Heat Cost Allocation in Apartment Buildings .....	27
Evaluation of Efficient District Heating Systems .....	28
Role of vehicle-to-grid systems for electric load shifting and integration of intermittent sources in Latvian power system .....	29
Analysis of Coniferous Wood Waste in Baltic States .....	31
Methodology of Practical Work in Demand Side Management Study Course .....	33
Modelling of biomass gasification. Fuel moisture effect on the mass and energy balance .....	34
Simulation of power system with stochastic energy resources and compressed air energy storage .....	36
Co-digestion of macroalgae for biogas production: an LCA-based environmental evaluation .....	38
Combined and mixed methods research in environmental engineering: when two is better than one .....	40
Solar energy use in landfill .....	42
The role of green infrastructure to improve air quality .....	44
Shrinking city assessment methodology .....	45
Combined Methodology to Evaluate Transition to Low Carbon Society .....	47
Use of Thermal Superinsulation in Buildings .....	49
Reducing Household Electricity Consumption: The Role of Home Appliance Scheduling, Improved Energy Performance and User Behavioural Change .....	50
Government- and municipal-owned building energy efficiency system dynamics modelling .....	51
SWOT analysis approach for advancement of Waste-to-Energy Cluster in Latvia .....	53
Energy performance of historical buildings in Northern Climate zone .....	55
Cleaner production. Dried apple vitamin bars .....	57
Methodological approach for resilience assessment of urban energy metabolic systems: selection of indicators .....	59
Environmental impact of aviation .....	60
How to assess involvement of electricity end user in energy efficiency improvement. Analysis of survey results .....	61
Why wood fuel CHP is a sustainable solution. Analysis of operation experience .....	63
Efficiency diagram for district heating system with gas condensing unit .....	65
Life Cycle Assessment of Landfill Mining Project .....	67
First steps to develop biomimicry ideas .....	68
Triple Helix Approach in Waste Management System Analysis .....	69
Demand Side Management in Pellet production: Internal and External Factors .....	70
Granulometric composition influence on coniferous needle thermal conductivity .....	71
