Ilja Galkins

Ivars Rankis
Dries Vanoost
Anastasia Zhiravetska

RTU Press
Riga 2015

This book has been prepared with the financial support of European Union. Authors from Riga Technical University and University of Leuven (KU Leuven - Katholieke Universiteit Leuven), and both Universities are responsible for the content of this document. This publication reflects the views only of the authors, and it can not be regarded as the European Union's official position.

The book is developed in a frame of the project "Development of Training Network for Improving Education in Energy Efficiency" acronym: ENERGY, grant Nr. 530379-TEMPUS-1-2012-1-LVTEMPUS-JPCR.

Project was approved by the European Commission in frame of the Program Tempus IV – Fifth call for proposals (Programme guide EACEA/25/2011).

The textbook is devised for students, who study power electronic technology issues. The textbook can be useful for students and professionals, who deal with semiconductor devices, DC-DC converters, rectifiers, inverters, matrix converters and other power electronics equipment.

Sub-programme: Joint Projects

Action: Curricular Reform

Deliverable: 2.1 Development and translation of study courses within the frame of direction of Power Electronics.

Reviewers: Dmitri Vinnikov, Dr.sc.techn., Tallinn University of Technology,
Department of Electrical Engineering, Head of Power Electronics Group.
Andris Šniders, Dr.h.sc.ing., Latvia University of Agriculture,
Faculty of Engineering, Institute of Agricultural Energetic.

Contributors

Leonids Ribickis, Professor, rector of Riga Technical University, Faculty of Power and Electrical Engineering, director of Institute of Industrial Electronics and Electrical Engineering, 12-K1, Azenes Str., Riga, LV 1050, Latvia, Leonids.Ribickis@rtu.lv (Introduction, Part 7.2.)

Joan Peuteman, docent, electrical engineering, KU Leuven University, Faculty of Engineering Technology, KU Leuven@Kulab, ReMI research group, Zeedijk 101, B-8400 Oostende, Belgium, joan.peuteman@kuleuven.be (Part 3, Part 4)

Ilja Galkins, professor, electrical engineering, Riga Technical University, Faculty of Power and Electrical Engineering, Institute of Industrial Electronics and Electrical Engineering, 12-K1, Azenes Str., Riga, LV 1050, Latvia, gia@eef.rtu.lv (Part 2, Part 5)

Ivars Rankis, professor, electrical engineering, Riga Technical University, Faculty of Power and Electrical Engineering, Institute of Industrial Electronics and Electrical Engineering, 12-K1, Azenes Str., Riga, LV 1050, Latvia, rankis@eef.rtu.lv (Part 1, Part 6)

Dries Vanoost, PhD researcher, electrical engineering, KU Leuven University, Faculty of Engineering Technology, KU Leuven@Kulab, ReMI research group, Zeedijk 101, B-8400 Oostende, Belgium, dries.vanoost@kuleuven.be (Part 3, Part 4)

Anastasia Zhiravetska, associate professor, senior researcher, electrical engineering. IEEI: Riga Technical Univ., Faculty of Power and Electrical Engineering, Institute of Industrial Electronics and Electrical Engineering, 12-K1, Azenes Str., Riga, LV 1050, Latvia, Zhiravecka@eef.rtu.lv (Part 1, Part 7.1.)

Contents

Introduction	6
1. Semiconductor Devices in Power Electronics	9
1.1. Diodes	10
1.2. Thyristors.....	14
1.3. Transistors	19
1.3.1. Powerful Field Effect Transistors.....	23
1.3.2. Bipolar transistors with insulated base (IGBT)	25
1.4. Power losses	27
1.5. Comparison of Semiconductor Devices	29
2. Hard-Switching DC-DC Converters	31
2.1. Fundamentals of Hard-Switching DC/DC Converters.....	32
2.1.1. Quasi-Stationary Mode.....	32
2.1.2. Operation of Semiconductor Elements in Hard-Switching Converters.....	33
2.1.3. Operation of Inductors and Capacitors in Quasi-Stationary Mode	35
2.1.4. Open and Closed Loop Operation	36
2.1.5. Types of DC/DC Converters.....	37
2.2. DC/DC converters with energy transferring magnetic element	37
2.2.1. Genesis of basic DC/DC converters with energy transferring inductor	37
2.2.2. Static operation of DC/DC converters with energy transferring inductor	41
2.2.3. Chuk converter	54
2.2.4. SEPIC converter.....	56
2.2.5. ZETA converter.....	57
2.3. Multi-quadrant DC/DC converters	58
2.3.1. Synchronous buck converter – bidirectional output current.....	58
2.3.2. Diode and transistor half-bridge converter – bidirectional output voltage.....	59
2.3.3. Full-Bridge and Capacitor Half-Bridge Converters – Bidirectional Output Voltage and Current	60
2.4. Current fed converters	62
2.4.1. Synthesis of Current Fed Converters	62
2.4.2. Static Model of CF Converters.....	63
3. Rectifiers	65
3.1. Introduction.....	66
3.2. Single-phase rectifiers	66
3.2.1. Single-phase uncontrollable rectifiers.....	67
3.2.2. Single-phase controllable rectifiers	75
3.3. Three-phase rectifiers.....	109
3.3.1. Three-phase uncontrollable rectifiers	110
3.3.2. Three phase line-commutated diode rectifiers	112
3.3.3. Three phase line-commutated thyristor rectifiers.....	120
3.3.4. Active Front End.....	135

4. Inverters	147
4.1. <i>Introduction</i>	148
4.2. <i>Single-phase Voltage Source inverter</i>	149
4.2.1. Half-bridge VSI.....	149
4.2.2. Single-phase full-bridge VSI	161
4.3. <i>Three phase inverters</i>	166
4.3.1. square wave type Voltage Source Inverter	167
4.3.2. Pulse Frequency converter	173
4.3.3. Pulse Width Modulation	175
4.4. <i>Space-vector modulation</i>	179
4.4.1. Clarke Transformation.....	179
4.4.2. Eight possible states.....	183
4.4.3. Making the PWM signal.....	185
4.5. <i>CSI</i>	188
4.6. <i>Voltage source based multilevel topologies</i>	189
4.6.1. The sinusoidal PWM technique for three-level VSI	191
4.6.2. The sinusoidal PWM technique for N-level VSI	193
4.6.3. Space-vector modulation in three-level VSI	194
5. Matrix Converters	195
5.1. <i>Configuration of Matrix Converters</i>	196
5.2. <i>Electronic Switches</i>	197
5.3. <i>Commutation of switches in MC</i>	198
5.4. <i>Control of MC</i>	200
6. Snubber Circuits and Soft-Switching Converters	203
6.1. <i>Switching Trajectory</i>	204
6.1.1. The Really Operation Conditions of a Switch in Converter Scheme.....	204
6.1.2. Safe Operating Area and switching process trajectory.....	207
6.2. <i>Snubber Circuits</i>	209
6.2.1. Snubber circuits for improving a turn-off process of switching transistor	209
6.2.2. Improvement of turn-on process of switching transistor.....	214
6.3. <i>Soft-switching Converters</i>	216
6.3.1. Zero Current (ZC) and Zero Voltage (ZC) Commutation	216
6.3.2. Soft commutated converters.....	222
6.4. <i>Resonant and Quasi-Resonant Converters</i>	224
6.4.1. Quasi-Resonant QR converters	224
6.4.2. Zero-Voltage transition converter	229
6.4.3. Resonant Converters	231
7. Selected Topics in Power Electronics	237
7.1. <i>Power Electronics in Energy Transmission</i>	238
7.1.1. General construction of the system	238
7.1.2. Practical realization of the thyristor DC transmission system	240
7.1.3. DC transmission with transistor converters	243
7.1.4. The practical realization of the system.....	246
7.2. <i>Power Electronics in Renewable Energy Production</i>	247
7.2.1. Renewable Energy Sources.....	247
7.2.2. Renewable Electrical Energy production plants and systems.....	247
7.2.3. Power electronic converters for wind turbines.....	253
7.2.4. Power electronic converters for solar PV plants.....	258
7.2.5. Power electronics for power plants with Fuel Cells	264
7.2.6. Power electronics in the integrated renewable sources of electrical energy	272
