

**10<sup>TH</sup> PAUL WALDEN SYMPOSIUM  
ON ORGANIC CHEMISTRY**

**Programm and Abstracts**

Riga  
June 15-16, 2017

## Table of contents

### Lectures

<b>Erika Bizdena.</b> Purine functionalization via their diazido and bis-triazolyl derivatives.	11
<b>Valdis Kokars.</b> Donor-acceptor type low molecular organic glasses and phosphorescent dyes applied for solution-processed photonic materials.	12
<b>Janis Jaunzems.</b> Industrial fluorinations & organic fluorinated intermediates.	14
<b>Eriks Rozners.</b> Amide-modified RNA: synthesis, structure and RNA interference activity.	15
<b>Kaspars Tars, Ilva Lieknina, Svetlana Kotelovica, Mihails Shishovs, Yi-Pin Li.</b> Capsids of ssRNA phages: structural studies and development of vaccines	16
<b>Andis Slaitas.</b> Benzimidazoles as potential pain controllers	17
<b>Olafs Daugulis.</b> New methods for carbon-hydrogen bond functionalization	18
<b>Vilnis Liepins.</b> The use of DoE in chemical process optimization	19
<b>Ronalds Zemribo.</b> Discovery of remeglurant, a potent and selective mGluR5 receptor negative allosteric modulator	20
<b>D.Honcharenko, M.Jezowska, A.Ghidini, C.S.J.Rocha, S.Milton, M.Murtola, C.I.E.Smith, M.Honcharenko, R.Strömberg.</b> Modification and conjugation of oligonucleotides for development of oligonucleotide therapeutics	21
<b>Jevgeņija Lugiņina.</b> Aziridine ring opening and other reactions in liquid sulfur dioxide.	22
<b>Martins Otkovs, Nina Kronqvist, Marlene Andersson, Gefei Chen.</b> Towards spinning of artificial spider silk	23
<b>Helmars Smits.</b> Agrochemical process research: synthesis of aryl 1,3-diones and stereoselective cyclopropanation.	24

### Posters

<b>Laura Adere.</b> Dihydrocinnamic acid esters as antioxidants.	27
<b>Rūdolfs Beļauņieks, Uldis Peipiņš, Andis Melders.</b> 28-Deoxy-28-aminobetulin and its synthetic application.	28
<b>Estefanija Bogdanova.</b> Crystal structures and solid form diversity of several chloronitrobenzoic acid isomers	29
<b>Pavels Dimitrijevs.</b> Contribution of molecular structure to physicochemical properties and cytotoxicity of bifunctional lipid-like 4-(N-alkylpyridinium)-1,4-dihydropyridines	30
<b>Daniela Godiņa.</b> Stability studies of bioactive compounds from birch outer bark ethanolic extracts	31
<b>Lūkass Tomass Lukaševics.</b> Cyclopropane C-C bond cleavage in the Ritter reaction conditions	32
<b>Renāte Melngāile.</b> Investigation of intermolecular olefine iodosulfenylation reaction	33
<b>Matīss Pāls.</b> Determination of quaternized ammonium salts in solution after organoclay processing	34
<b>Mikus Puriņš.</b> Synthesis of silyl dienes from propargyl silanes	35
<b>Jekabs Ragze.</b> Derivatization of 1,4-dihydropyridines at 2,6-position and studies of their self-assembling properties	36

<b>Rimants Zogota, Linda Kinena.</b> The development of aspartic-protease inhibitors for malaria treatment.....	37
<b>Elīna Zoltnere, Uldis Peipiņš.</b> The 1 <sup>st</sup> generation dendrimeric antioxidants of arylmethyl Meldrum's acids.....	38
<b>Dace Cīrule.</b> Nucleoside silylation and reactions of triazolypurine derivatives with nucleophiles ...	39
<b>Diana Dzabijeva.</b> The studies on the antiradical activity kinetics of the different antibacterial plant extracts .....	40
<b>Livia Matt.</b> Hydroformylation of olefinic derivatives of isosorbide and isomannide .....	41
<b>Kristers Ozols.</b> 2/6-Azido-6/2-alkylthiopurine synthesis and DFT study.....	42
<b>Armands Ruduss.</b> Synthesis and properties of 3-(diphenylamino)carbazole moiety containing chromophores for organic solar cell application.....	43
<b>Armands Sebris, Zigfrīds Kapilinskis.</b> Synthesis of fluorescent purine derivatives with N(9) amorphousing groups .....	44
<b>Marcis Sejejs, Artis Kinens.</b> Tetrazole hemiaminal as a chiral auxiliary .....	45
<b>Anda Sīpola.</b> Diastereodivergent synthesis of amino epoxides.....	46
<b>Krista Suta.</b> Alkyne transformations in liquid SO <sub>2</sub> .....	47
<b>Sindija Zēberga.</b> Practical synthetic approach towards lepadins .....	48
<b>Konstantinos Grammatoglou, Jekaterina Sirotkina.</b> C-Quaternary alkynyl glycinols <i>via</i> the Ritter reaction of cobalt complexed alkynyl glycols .....	49
<b>Toms Kalnins.</b> Abstract withdrawn.....	50
<b>Artis Kinēns, Simonas Balkaitis.</b> Synthesis of chiral DMAP catalysts .....	51
<b>Ilze Kumpiņa.</b> Iron catalysed synthesis of arylphosphonic acid esters .....	52
<b>Anna Lielpētere.</b> Electrochemical generation of carbenium ions <i>via</i> electroauxiliary .....	53
<b>Ruslan Muhamadejev.</b> Intramolecular hydrogen bonds in 1,4-dihydropyridine derivatives .....	54
<b>Anete Parkova.</b> Cyclic boronic acids as beta-lactamase inhibitors.....	55
<b>Elina Petrova.</b> Synthesis of peptidic $\alpha$ -ketoamide analogues of known PfSUB1 inhibitor .....	56
<b>Aleksandrs Pustenko.</b> Carbonic anhydrases: inhibitor synthesis.....	57
<b>Marija Skvorcova.</b> Intramolecular cyclopropylmethylation <i>via</i> non-classical carbenium ion .....	58
<b>Diāna Zača.</b> Synthesis of potential epigenetic enzyme inhibitors .....	59
<b>Diāna Zeļencova.</b> Mapping of the active site of $\epsilon$ -trimethyllysine hydroxylase .....	60
