

ISSN 2243-6057

Book of abstracts
of the 8th International
Conference on Silicate Materials

BaltSilica 2018

May 30 – June 1, 2018
Riga, Latvia

RTU Publishing House
Riga, 2018

CONTENTS

ORGANIZERS	3
INTERNATIONAL SCIENTIFIC COMMITTEE	3
LOCAL ORGANIZING COMMITTEE	3
PREFACE	5
CONFERENCE PROGRAMME	6
T1. Natural and Artificial Stone Materials	18
Invited lectures	19
Kilchoanite, α -C ₂ SH and Hydroxylatedgrewwite: Hydrothermal Synthesis and Thermal Stability.....	20
Oral presentations	22
Influence of Silica-Fume Source on Crystallization of Xonotlite, Tobermorite and C-S-H Gel.....	23
Temperature Influence on Rankinite Carbonation Hardening Process	25
Research on Properties of High Performance Foamed Concrete.....	27
Poster presentations	29
Pozzolanicity Behaviour of Smectite Clay Waste	30
The Use of Two Approaches for Recycling of Wood Ash into Illite Clay Products	31
Katoite Synthesis under Hydrothermal Conditions from Mixture of Oxides and CO ₂ Influence for C-A-H System	32
Processing of Dolomitic By-products into Porous Restoration Binder	34
The Influence of Sonication on the Effect of Cement Additive Opoka on Portland Cement Hydration.....	35
Influence of Cupola Dust on the Hydration of Anhydrite Binding Material .	36

Wood Ashes as a Binder Component.....	37
Study of the Possibility of Utilization of Wood and Shale Ash.....	38
The Improvement of Silica Gel Waste Properties by Using Different Additives.....	39
Thermal Insulating Materials from Silica-Calcite Sedimentary Rocks	40
Early-stage Hydration of Belite-Calcium Sulfoaluminate-Ferrite Cement....	42
Steel Fibre Performance in Concrete with Expansive Additives under Restrained Hardening Conditions	43
T2. Traditional and Advanced Ceramic and Glass-Like Materials .44	
Invited lectures	45
Alkali-activated Binder from Tungsten Mining Waste and Waste Glass	46
From Traditional to Smart Refractories	47
Development principles of ceramic matrix composites with extreme dynamic strength.....	48
Oral presentations	50
Highly Porous Cordierite Ceramic with Additive of Some Nanopowders	51
The Effect of Adsorption Temperature on the Uptake of Cu^{2+} , Co^{2+} and Cr^{3+} Ions by Hydrotalcite.....	52
Study of the Performance Characteristics of Erbium-containing Laser Glasses	54
Andalusite as a Source of the Gehlenite-Anorthite Materials Precursor	56
Natural Radioactivity in Clay Ceramics and their Raw Materials in Latvia..	58
Influence of WO_3 Amount on the Properties of Porous Mullite Ceramic	59
Porous Cordierite Ceramics with Illite Clay Additive: Synthesis and Properties	61
Crack Reduction in Clay Bricks by Surfactants	62
Development of Biomorphic Cellular Ceramic using Illite Clay	64

Poster presentations	65
The Formation and Properties of Mg/Al Mixed Metal Oxides Intercalated with Cu ²⁺ Ions	66
Sol-gel Coated Enamel for Steel	67
The Effect of the Mineral Composition of the Clay on the Strength of the Product	68
Increase of Temperature and Fire Resistance for Reinforced-Concrete Structures by Surface Treatment with Protecting Coating	70
T3. Inorganic and Hybrid Nanomaterials	72
Invited lectures	73
Hydrodeoxygenation of Anisole under Mild Reaction Conditions by Using Ordered Mesoporous Silica with Ru or Pt Atoms	74
Hierarchically Structured Electroconductive Oxide Ceramics	76
Novel Inorganic Materials for Photovoltaics.....	78
Oral presentations	79
Correlation between Optical, Morphological and Compositional Properties of GeSn Layer Irradiated by Infrared Nd:YAG Laser Radiation	80
Low-Temperature ZnO and Cu _x O-ZnO Heterostructure Formation on Glass and Fabric Substrates	82
Evaluation of the Physical and Mechanical Characteristics of Nanostructured Antifriction Coatings Based on Ti-Cu.....	83
Evaluation of the Physical and Mechanical Characteristics of Multi-Layer Corrosion Resistant Nanostructured Metal Coatings.....	85
Poster presentations	87
Photocatalytic Properties of ZnO-TiO ₂ Composite Films Prepared by Spray Pyrolysis.....	88
Control of the Size and Distribution of Au Nanoparticles by Laser Radiation	90
Technological Features of the Development Nanostructured Antifriction Coatings Based on Ti-Cu.	92

Development of Single-Layer Corrosion Resistant Nanostructured Ion-Plasma Coatings Based on Ti-Al-N for the Protection of Metallic Materials and Structures.....	94
Biomass Upgrading Through Hydrodeoxygenation Process Catalyzed by SBA-15 Silica Materials Containing Pd Atoms	96
Synthesis Procedure and Physicochemical Characteristics of Ordered Mesoporous Silicas Containing Platinum Atoms	98
Adsorption of Organic Compounds on Latvian Clay Minerals	100
Methods for Synthesis of TiZrO ₄ and Ti ₂ ZrO ₆ Ceramic Materials.....	101
Synthesis of Nanoporous ZrTiO ₄ , Ti ₂ ZrO ₆ Ceramic Materials	102
Effect of Sulfonic Groups Content on Structural and Textural Parameters of MCM-41 Mesoporous Silica Materials	104
Catalytic Activity of MCM-41 Mesoporous Silica Materials Containing Sulfonic Groups as Acid Catalysts	106
Low-temperature Copper Hydroxyl Acetate Hydrate and Zinc Hydroxyl Acetate Hydrate Nanostructure Formation.....	108
FT-IR Analysis of Electron Irradiated Single and Multilayer Si ₃ N ₄ Coatings	109
Microwave-assisted Hydrothermal Synthesis of ZnFe ₂ O ₄ /TiO ₂ Composite and Photocatalytic Properties.....	111
T4. Physical and Numerical Processing Simulation of Inorganic Materials	112
Invited lectures	113
Optical Properties of Quantum Cones Formed in Semiconductors by Laser Radiation	114
Oral presentations.....	116
The Matrix Effect and Application of the Multi-parameter Optimization Method for X-ray Spectrometric Determination of the Quantitative Composition of Clays.....	117
The Synthesis of Wollastonite from Silica Gel Waste	119

Poster presentations	120
Phase Transformation in CaO-SiO ₂ -Al ₂ O ₃ -H ₂ O System under Hydrothermal Conditions at 200 °C at the CaO/SiO ₂ ratio 1.5	121
Formation and Thermal Stability of Calcium Aluminum Compounds in the Mixture with CaO/Al ₂ O ₃ = 1.7.....	123
Sulfur Waste Treatment Peculiarities under Hydrothermal Conditions	125
Most Recent Data Obtained with CAMECA SIMS Instruments (NanoSIMS50L; IMS7f-Auto).....	126
INDEX	127
